Electric games

Description

This project is a dynamic website designed to engage users with a gaming theme, featuring a collection of pages that include a homepage, games and characters showcases, and a custom-made Hangman game. Developed with an emphasis on universal design, the website ensures accessibility and ease of use across various devices and screen sizes. The frontend interacts with a .NET backend via Axios to manage data stored in MongoDB, providing a seamless experience for managing game and character information.

Features

In the project directory, you can run:

npm start

Runs the app in the development mode. Open <http://localhost:3000> to view it in your browser.

The page will reload when you make changes. You may also see any lint errors in the console.
